

Workshop
STRATEGIC INTERACTIONS AND GENERAL EQUILIBRIUM III:
THEORIES AND APPLICATIONS
SEPTEMBER, 6-7 TH 2012
UNIVERSITE DE BOURGOGNE

Recent developments in general equilibrium theory focus on strategic interactions. Several models offer strategic foundations for the theory of perfect competition. Others analyze the functioning of markets and the working of market power in economies where competition takes place on multiple markets among many agents. This third workshop is devoted to recent developments in the field.

Papers in the following areas are welcome:

- Strategic multilateral exchange
- Cournot-Walras models
- Strategic market games
- Mixed markets exchange economies
- Applied papers within the preceding frameworks

Scientific committee:

G. Codognato (University of Udine), L.A. Julien (Université de Bourgogne)

Deadline for submission May, 31 th 2012

Papers in Pdf format must be sent to:

ludovic.julien@u-bourgogne.fr
